Tires

Rely on Kal Tire for consistent pricing and expert service at every location. Each location offers tire services that are performed by certified technicians to ensure quality work, every time.

New tires

As a multi-brand dealer with deep expertise, Kal Tire brings you both exclusive brands and national top-sellers to recommend the best passenger and commercial light truck tires for the job. With our broad selection of in-store stock as well as our own transportation network, you can be sure when you need new tires, you can get them from a Kal Tire store near you.

Seasonal tire changes

Ensure your tire changeovers are completed on time and adhering to your fleet maintenance schedule. Our certified tire technicians who will get you back on the road in no time.

Inspections

Our thorough tire inspections identify issues early for proactive maintenance.

Flat tire repair

We always repair your tires using both plugs and patches, as recommended by the Rubber Manufacturer's Association.

Tire rotation

Rotating your tires can deliver a smoother ride and enhances safety, fuel efficiency, tire life and suspension performance.

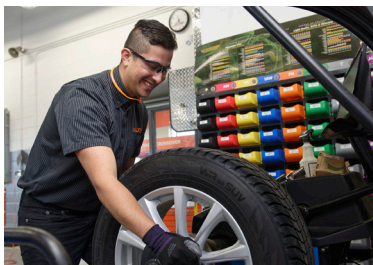

Brakes

With something as important as your brakes, look no further than our expert technicians. Find out the current state of your brakes by booking a free visual brake inspection and our expert technicians will explain what work is required and provide a transparent estimate. We will only ever use parts that meet or exceed OE (original equipment) specifications. Our industry-leading warranty covers you for brake parts and labour for 3 years or 40,000 km.

Our brake services include:

- ✓ Pads/shoes
- ✓ Rotors, calipers, drums
- ✓ Brake flush
- ✓ Parking brakes
- ✓ Hoses and hydraulic cylinders

Alignments

Wheel misalignment can reduce fuel economy, create expensive tire replacement costs and affect your safety. Using our alignment technology, we ensure all four wheels are parallel and sitting flat on the road and that your steering wheel is centered.

A wheel alignment is recommended when:

- ✓ New tires are installed
- ✓ You experience uneven tire wear, steering pull, or an off-centre steering wheel
- ✓ Your vehicle has had an accident or a hard impact with a curb, potholes or road debris
- ✓ You lower or lift your vehicle
- ✓ Your vehicle drives on all-season or all-weather tires year-round, and it's been 1-2 years since your last alignment service
