

**KAL TIRE**

Retread & Road Hazard Warranties

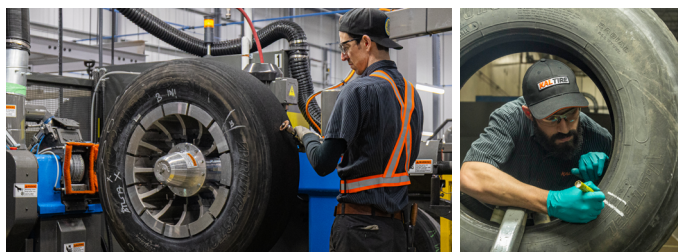

Peace of mind. Free.

High-performance tires you can count on backed by Canada's best retread and road hazard warranties.

Kal Tire's Retread and Road Hazard Warranty are limited. Please read and understand the conditions outlined below.

1. RETREAD WARRANTY¹

- Kal Tire warranties all our retreads (customer or Kal Tire casing) to be free of defects in our materials, workmanship and casing failure to 2/32 of an inch of remaining tread.
- Workmanship and materials defect warranty does not cover damage from road hazards, improper inflation, wheel misalignment, repairs by another dealer(s), incorrect/improper mounting, vehicle damage, damage caused by abuse and neglect, collision, fire, curbing, vandalism and chemical corrosion.
- Credit is prorated based on actual invoice price.²

¹ Additional customer responsibility restrictions apply along with items not covered by Kal Tire. See in-store for details.

² Actual invoice price refers to the price paid for products purchased from Kal Tire.

³ Contact your Kal Tire sales representative for details on national account warranty.

⁴ Other restrictions apply. See in-store for details.

2. RETREAD ROAD HAZARD WARRANTY

Full replacement, repair or credit is based on original invoice price and provided within the first:

- Warranty does not cover chain damage or mechanical failure.
- Warranty not applicable to key or national accounts.³
- Warranty will be honoured at any Kal Tire commercial location in Canada.⁴

Retreads Made in Canada— The Smarter Tire Choice in Every Way.

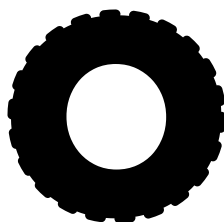

✓ THE ENVIRONMENT

Kal Tire retreads provide savings that both your fleet and the environment will thank you for. Kal Tire retreads conserve and use resources responsibly. Compared to making a new tire, retreads give a tire's casing a second or even third life.

Oil used to produce
a medium truck tire:

RETREAD:
26L

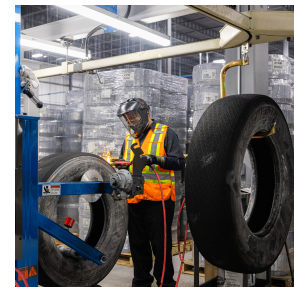

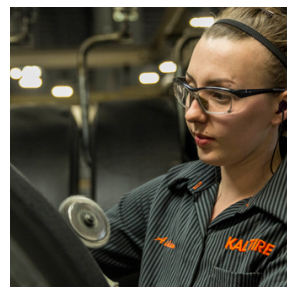

NEW:
83L

✓ CIRCULAR SOLUTIONS

Kal Tire collects 5-6 million lbs of buffings per year from 10 retread plants across Canada. Through the devulcanization process, that material is then reused back into our OTR retreads at a 25% rate, reducing the need for additional raw materials.

✓ LOCAL JOBS

Our certified retread technicians are hardworking Canadians who take great pride in their tires and their communities. Our commercial stores and retread facilities are important employers and contributors to their local economies.

To find out more about Kal Tire's retread program, speak to your Kal Tire sales representative or visit our website.
