

KAL TIRE

Light duty fleet services

Essential fleet services at every Kal Tire

Roll into any of **Kal Tire's 280+ stores** across the country and receive expert tire, brake, alignment and oil services by our highly skilled Kal Tire technicians.

Rely on Kal Tire as your tire and vehicle maintenance partner to keep your fleet vehicles performing at their best. As Canada's largest tire dealer and service provider, you can be confident our team of experts will ensure your vehicles get the very best service and get you rolling again quickly.

With Kal Tire as your preventative maintenance partner, we work with you to develop a service guide that captures your tire and service requirements. That way, whatever store you pull into, you can be sure of a standardized service and pricing as agreed with you.

- ✓ Increase uptime and optimize fleet usage with scheduled repairs
- ✓ Reduce unexpected and high-cost repairs
- ✓ Extend vehicle life
- ✓ Improve compliance with due diligence standards on vehicle maintenance history, government audits and safety

Commercial.KalTire.com

Tires

Rely on Kal Tire for consistent pricing and expert service, with certified technicians delivering quality work every time. Backed by strong in-store inventory and our own distribution network, we make sure you get the right tire when you need it.

- ✓ New tires
- ✓ Seasonal tire change
- ✓ Inspections
- ✓ Flat tire repair
- ✓ Tire rotation

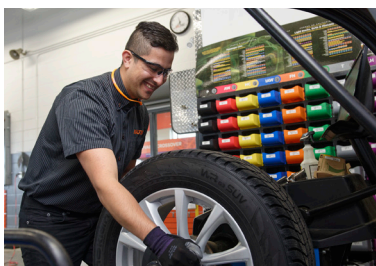

Brakes

Our experts will check your brakes with a free visual inspection, explain any necessary work, and provide a clear estimate.

Our brake services include:

- ✓ Pads/shoes
- ✓ Rotors, calipers, drums
- ✓ Brake flush
- ✓ Parking brakes
- ✓ Hoses and hydraulic cylinders

Alignments

Wheel misalignments lower fuel efficiency, increase tire replacement costs and compromise safety.

A wheel alignment is recommended when:

- ✓ New tires are installed
- ✓ You experience uneven tire wear, steering pull, or an off-centre steering wheel
- ✓ Your vehicle hits a curb, pothole, debris, or is in an accident
- ✓ You raise or lower your vehicle
- ✓ It's been 1-2 years since your last alignment (with year-round all-season/all-weather tires)

Oil service

Our oil service solutions offer two options, giving you the flexibility to choose what best suits your fleet's needs:

- ✓ **Basic inspection** - checks for any warning lights, operation of wipers, lights, horn, air filter and a visual inspection of the underside of the vehicle.
- ✓ **Multipoint inspection** - covers all safety-related components including tires, steering, suspension, brakes, lights and driveline, as well as key maintenance items such as belts, battery, hoses, fluids and filtration. A tire rotation is included at no charge if required.
